AfriSAF Ltd – is here to leverage the untapped natural resources of Africa to drive Circularity and Energy Transition

Only for release after 2nd April 2025, 9am BST

1st April 2025

Africa's vast landmass, home to 54 nations, contains abundant untapped agricultural feedstocks, crucial for tomorrow's energy needs. AfriSAF is revolutionising access to these resources through our digital marketplace, connecting feedstock owners with buyers while providing logistics and support services to build a robust feedstock economy.

Through our value-added approach to feedstock transactions, we deliver benefits across profit, social impact, and environmental sustainability. Our current focus includes partnerships with agricultural out-growers and commercial farmers to produce energy oil crops using intercropping and marginal land approaches. This aligns with EU Annex IX A (Advanced Biofuels) under the Renewable Energy Directive, qualifying for RefuelEU SAF requirements.

AfriSAF aims to establish clean energy production across Africa, beginning with mature pathways and readily available feedstocks that meet EU Annex IX B standards. Through strategic partnerships, we're forming bankable consortiums capable of producing some of the world's most competitively priced sustainable fuels.

Join us as we unlock Africa's feedstock potential to drive a circular economy while scaling low-cost, abundant, sustainable fuels.

About AfriSAF

AfriSAF, a UK-based company, is dedicated to unlocking Africa's vast potential for clean energy development. Leveraging its founding team's deep expertise and extensive industry experience, AfriSAF acts as both an enabler and developer of sustainable energy projects. Positioned within one of the world's most promising regions for abundant and competitively priced renewable fuels, AfriSAF is committed to facilitating impactful projects that deliver economic, social, and environmental benefits across the African continent.
